

**UNION MEDICAL HEALTHCARE LTD:  
GENTLEMEN: READ THIS ... AND WEEP !**

For people, watching television and listening to the seemingly effervescent speeches of the Presidential hopeful, Mrs Hillary Diane Rodham Clinton, of late, it is very obvious that this lady looks nowhere near her chronological age.

In truth, Mrs Hillary Diane Rodham Clinton is 68 years old, today, and shall be 69 years old come this October.

The reason that this lady is able to hold onto the facial appearance of one in her late 40s or early 50s is due, almost certainly, to numerous cosmetic applications, those applications, having been performed by members of the American medical profession.

These applications are termed in the jargon of those professionals, administering them, as '*aesthetic surgical procedures*', commonly known as '*plastic surgery*'.

The definition of the term, '*aesthetic surgical procedures*', is given at Page 30 of the Global Offering Prospectus of the latest company, coming to the premier equity market of the Hongkong Special Administrative Region (HKSAR) of the People's Republic of China (PRC) in order to raise material sums of money by pitching a Global Offering of Shares.

The definition of '*aesthetic surgical procedures*' is:

*'Surgical procedures concerned with the restoration, reconstruction, correction, or improvement in the shape and appearance of the face or body, which may be cosmetic or reconstructive in nature.'*

Many married ladies, whose husbands are not short of surplus cash, and being desirous of wanting to try to hold onto their youthful appearances when they are well into their middle age, are well aware of the cosmetic advantages of spending money on obtaining injections of BOTOX and other, so-called life medications.

BOTOX injections are intended to result in less wrinkling of the skin in the areas treated by blocking the signals from nerves to muscles, causing weaker muscle contraction or even complete cessation of muscle movement.

For husbands, whose wives determine to try to hold onto an appearance of being younger than their chronological age by visiting those professionals who administer BOTOX and pay large sums of money for the privilege, reading the Global Offering Prospectus of Union Medical Healthcare Ltd () (Code: 2138, Main Board, The Stock Exchange of Hongkong Ltd) could well be an eye-opener.

Because, for those Hongkong businessmen and members of the Hongkong medical profession, operating shops that specialise in providing aesthetic medical services for ladies, there are hundreds of millions of dollars to be earned.

It should, also, be added, at this point, that even a smaller number of middle-aged, Hongkong males are not

averse to visiting those same shops as their female contingent in order to obtain a jab or two of BOTOX.

After all, sauce for the goose is sauce for the gander, is it not?
